PROFILE

Computer Science (B.Sc.) student at TU Berlin and working student software engineer (frontend) at Raisin. Alongside my studies I build and run my own web products in React, TypeScript and Node.js, from architecture and payments to deployment and user support.

EXPERIENCE

Working Student Software Engineer (Frontend)

10/2026 – Present

Raisin, Berlin

- Frontend development in a cross-functional team that builds and operates Raisin's US savings platform.

Founder & Full-Stack Developer

2024 – 2026

PromptCatalyst.ai · still live

- Designed, built and operated a full-stack AI platform for prompt optimization and image and video generation.
- Built the React front end with code-split, prefetched routes and asynchronous generation workflows that keep the interface responsive during long-running jobs.
- Implemented the Node.js and MongoDB backend with authentication, Stripe subscriptions and cloud deployment; the client separates auth, quota and network failures before surfacing an error.
- Grew the product to over 10,000 registered users and generated over \$9,000 in revenue from paying customers.
- Shipped the companion extension to Chrome and Firefox from a single Manifest V3 codebase, with OAuth 2.0 sign-in and automated release verification; reached 2,400+ users, rated 4.68/5.

PROJECTS

Theoretico.io

2025 – Present

Founder & Developer

- Built an interactive history-learning platform around decision-based simulations with AI-generated narration, artwork and voice.
- Put per-user rate limits and a global spend ceiling in front of the AI calls, with a Redis-backed pause switch to cap cost exposure.
- Led product design, development and deployment as sole developer on Next.js, React, TypeScript and Supabase.

Theoretico (YouTube)

2025 – Present

Founder & Content Creator · youtube.com/@TheoreticoYT

- Founded and grew an educational history brand to 179,000 YouTube subscribers and over 63 million views, plus 119,000 followers on TikTok and 39,000 on Instagram.

EDUCATION

B.Sc. Computer Science

10/2024 – Present

Technical University of Berlin (TU Berlin), expected 2028

Applied Mathematics (undergraduate coursework)

08/2021 – 05/2023

French University in Armenia, Yerevan · two years completed, left to study in Germany

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, C++

Frontend: React, Next.js, Tailwind CSS, Zustand, React Router, Framer Motion, Radix UI

Backend & Infrastructure: Node.js, MongoDB, Supabase, Redis, AWS, Vercel, Stripe API

Tools & Practice: Git, GitHub Actions, REST APIs, Jest and React Testing Library, Manifest V3 browser extensions
