PROFILE

Computer Science (B.Sc.) student at TU Berlin who builds and ships software products end to end. Designed and built a full-stack AI platform that reached 10,000+ registered users and around \$8,800 in revenue, plus a companion browser extension rated 4.68/5 by 2,400+ users across the Chrome and Firefox stores. Comfortable owning a product from first commit to live users: architecture, front end, payments, deployment, analytics and support. Available 20 hours per week alongside my studies.

EXPERIENCE

Founder & Full-Stack Developer

2024 – Present

PromptCatalyst.ai

- Designed and built a full-stack AI platform for prompt optimization, image generation and video generation, developed independently end to end.
- Built the React front end with code-split, prefetched routes and asynchronous generation workflows that keep the interface responsive during long-running jobs.
- Implemented the Node.js and MongoDB backend with authentication, Stripe subscriptions and cloud deployment; the client separates auth, quota and network failures before surfacing an error.
- Grew the product to over 10,000 registered users and generated approximately \$8,800 in revenue from paying customers.
- Ship the companion extension to Chrome and Firefox from a single Manifest V3 codebase, with OAuth 2.0 sign-in and automated release verification; 2,400+ users, rated 4.68/5.

Founder & Developer

2025 – Present

Theoretico.io

- Built an interactive history-learning platform around decision-based simulations with AI-generated narration, artwork and voice.
- Put per-user rate limits and a global spend ceiling in front of the AI calls, with a Redis-backed pause switch to cap cost exposure.
- Led product design, development and deployment as sole developer on Next.js, React, TypeScript and Supabase.

Founder & Content Creator

2025 – Present

Theoretico · youtube.com/@TheoreticoYT

- Founded and grew an educational history brand to 179,000 YouTube subscribers and over 63 million views, plus 119,000 followers on TikTok and 39,000 on Instagram.
- Researched, wrote, produced and published educational content, and used analytics and SEO to drive growth.

EDUCATION

B.Sc. Computer Science

Expected 2028

Technical University of Berlin (TU Berlin)

High School Diploma

2021

Anania Shirakatsy Lyceum, Yerevan, Armenia

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, C++, C#

Frontend: React, Next.js, Tailwind CSS, Zustand, React Router, Framer Motion, Radix UI

Backend & Infrastructure: Node.js, MongoDB, Supabase, Redis, AWS, Vercel, Stripe API

Tools & Practice: Git, GitHub Actions, REST APIs, Jest and React Testing Library, Manifest V3 browser extensions
